

Citrix XenServer, XenApp, XenDesktop Syllabus

General Information

Description

Citrix XenServer is an industry and value leading open source virtualization platform for managing cloud, server and desktop virtual infrastructures.

Citrix XenApp is the industry-leading solution for virtual application delivery, providing Windows apps as secure mobile services.

Citrix XenDesktop delivers Windows apps and desktops as secure mobile services. With XenDesktop, IT can mobilise the business, while reducing costs by centralising control and security for intellectual property.

Course Deliverables

Classroom Training

Instructor led classroom training will be given. All classes are demonstration based. We don't teach just theory. We teach every concept using real-time case studies. All our classrooms are digital classrooms.

Hands-on Lab

Students can practice all the concepts taught in classrooms at our Lab facility. Each student will be given individual setup to practice the lab. They need not combine and do labs. Our lab coordinators will help you when you are doing the labs

Books and Workbooks

Standard text books will be provided.

Course Topics

TOPICS

Citrix Xen Server Administration

Open-source Server and Licensing

User management and AD integration

Single and Multiple host management with XenCenter

XenServer Networking

 Networks in Standalone server

 Cross-Server Private Networks.

Managing Resource Pool

 Storage

 Hosts

High Availability

 Working with VMs

Shared Storage

Disaster recovery and backup.

CLI

Citrix XenApp and XenDesktop servers

Creating a XenApp and XenDesktop server farm

Deploying Applications

Deploying VDI (Virtual Desktop Infrastructure)

XenApp clients.
